Re: Docket No. 28903

It is our opinion that these proposed changes, as written, do not properly address the effect on general aviation aircraft. Unless specifically detailed, these changes would prevent a great majority of STCs from being issued, depriving general aviation aircraft of the incremental and modest improvements in performance and safety that current modifications and products allow. As such, we are firmly opposed to these rule changes as they apply to general aviation aircraft.

Al Petrone, President
